

The Missing Link.

Finally, the ability to quickly link the outside of a home to what your customers expect from a security system. Give real coverage to driveways, outdoor living spaces, entry ways, garage & sliding doors, or even side yards & gates. Get notifications with chimes, on smart phones, or even trigger cameras through panels' connected services and existing keypads - all at a cost of traditional indoor sensors with the same quick installation convenience.

FITLINK

WEATHERPROOF
ANIMAL TOLERANT
QUICK AND EASY INSTALL
LONG BATTERY LIFE
AFFORDABLE DETECTION
