

ZeguraHD

Open platform solutions

Up to 70% Lower Cost of Hardware Compared to a Full IP Camera Deployment

The first and only product in the world that allows HD analog cameras to be integrated into any open platform video management systems (VMS).

KEY BENEFITS

- Plug-and-play installation that video technicians without IT background can perform
- Seamless integration with existing professional security and surveillance systems
- Cost effective HD video over 500m of coaxial cable
- The fidelity of uncompressed HD video with an option for H.264 compression
- Rapid time-to-market for video surveillance equipment OEMs

KEY FEATURES

- 4 or 8 channel high definition (HD) digital video recorder (DVR)
- Support for HDCVI (1080p or 720p) and CVBS (PAL or NTSC) inputs
- High bandwidth PCI express interface
